

두 노드 간 값의 차이가 가장 작은 노드의 값의 차이를 출력하라.

Input: nums = [-2,1,-3,4,-1,2,1,-5,4]

Output: 6

1.리스트로 변환

import sys

class Solution:

def minDiffInBST(self, root: TreeNode) -> int:

def preOrder(node):

if node == None:

return

preOrder(node.left)

self.arr.append(node.val)

preOrder(node.right)

result = sys.maxsize

self.arr = []

preOrder(root)

self.arr.sort()

for i in range(len(self.arr) - 1):

dif = abs(self.arr[i] - self.arr[i + 1])

if dif < result:

result = dif

return result

2.중위 순회

import sys

class Solution:

prev = -sys.maxsize

result = sys.maxsize

def minDiffInBST(self, root: TreeNode) -> int:

if root.left:

self.minDiffInBST(root.left)

self.result = min(self.result, root.val - self.prev)

self.prev = root.val

if root.right:

self.minDiffInBST(root.right)

return self.result

▸ 재귀

import sys

class Solution:

def minDiffInBST(self, root: TreeNode) -> int:

prev = -sys.maxsize

```
result = sys.maxsize
stack = []
node = root
while stack or node:
    while node:
        stack.append(node)
        node = node.left
    node = stack.pop()
    result = min(result, node.val - prev)
    prev = node.val
    node = node.right
return result
```
